

# Volunteers needed for MEG study of stammering

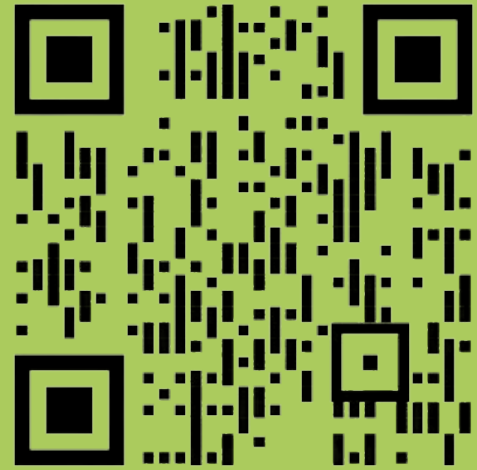

INSTEP Trial: MEG in healthy adults  
Research Ethics Committee Reference Number: R51267/RE002

**Wanted: Healthy native English-speaking men or women aged 18-45. We are looking for people who stammer AND people who do not stammer.**

**The study involves speaking and making button presses while your brain is scanned using MEG and takes up to 3.5 hours. The study may also involve having a 45-minute scan of your brain using MR. You will be reimbursed for your time.**

**Why? We want to understand how the brain processes and produces speech, and how this differs in people who stammer.**

**Interested? contact a member of the Speech and Brain Research Group on [instep@psy.ox.ac.uk](mailto:instep@psy.ox.ac.uk).**
